Alexander Building Construction announces completion of new Kish Bank Financial Center

State College, PA, May, 19, 2009 . . . Alexander Building Construction today announced the completion of the new Kish Bank Financial Center on Green Tech Drive in State College, PA. The work of this contract included the construction of a new 19,250 square foot two-story bank building and related site work. The new financial center is located on the corner of Valley Vista Drive and North Atherton Street. The first floor consists of bank offices, branch bank with teller line and drive-thru, security vault and bank equipment. The second floor contains a board room and office tenant space. The building includes extensive architectural details and custom built cherry millwork. Several sustainable features were incorporated into the design of the building. First, the main lobby includes cork flooring which is made from the waste of the cork wine stopper manufacturing process. It is durable and reduces the transmission of sound, vibration, and heat and thus is a great insulator. Second, the parking lot was paved utilizing 100% recycled asphalt. And third, a geothermal well was drilled to reduce energy consumption. Geothermal power is extracted from heat stored in the earth and is cost effective, reliable, and environmentally friendly. The project was completed in less than one year and was constructed utilizing local subcontractors and suppliers.
