Alexander Building Construction Co. completes state-of-the-art medical facility and new parking structure at Lancaster General Hospital

Harrisburg, PA, February 25, 2009 . . . Alexander Building Construction recently completed a new medical building for Lancaster General Hospital. The new building, known as “The Downtown Pavilion”, follows the completion of a new 1600-space parking garage for Lancaster General Hospital which Alexander completed last summer. A grand opening celebration is taking place in early March to celebrate the new medical building and the increased services that Lancaster General Hospital is able to provide as a result of the project.

The new four-story, 79,000 square foot Pavilion includes clinical treatment and wellness spaces, an MRI facility and a convenience shop for employees and visitors as well as an exercise area. A two-level glass pedestrian bridge was built to connect the new medical building to the main hospital across Duke Street. The 1600-space parking garage was designed to blend with the other historic structures in downtown Lancaster and is clad with brick and granite.

Rick Seitz, President of Alexander, notes “the Downtown Pavilion and the Queen Street Parking Garage project was a terrific accomplishment on a very tight site. The design and construction team, from LGH representatives to all of the subcontractors, did a great job and should be very proud of this project.”
